Please note that special codes can be given for events such as parties, family gatherings, someone watching your home while you are away, etc., just by notifying management at least 3 days prior to the event. A code will be issued for that event; then eliminated after the event has occurred. For example, a party on Saturday evening would be given a code that would work from approximately 1 hour before the event and end 1 hour after the event concludes. Please plan ahead as these codes must be entered PRIOR to the event and we cannot accommodate these requests at the last minute.
